

**WE
NEED
YOU**

#SaveDavesLife

My name is David Ray (33yrs old) and I live in Connecticut. I have a wonderful family with two young boys 9 and 11. I found out in 2016 that I have liver cirrhosis. **I need a liver transplant and that's my cure (MY HOPE).** Connecticut does have an organ shortage and although I'm on the waiting list I'm not expected to get a liver anytime in the future unless I become sicker. Approximately, **1 out of 5 patients unfortunately die** before transplant in Connecticut

Doctors say the best chance for a healthy future is a liver transplant from a living donor, and our family is searching for a donor who can give that gift

If you find in your heart to become a living donor Please contact the Yale living donor hotline. 1-866-925-3897
